# speedSENTINEL™

POWERED BY EYETRAFFIC™

Introducing **speedSENTINEL** from ANPR International. With the advent of Automatic Number Plate Recognition (ANPR) camera technology, the world of vehicle flow management is being transformed. **speedSENTINEL** is a fully integrated automatic vehicle flow management and reporting system that integrates data captured from ANPR Cameras with a range of linked devices, ancillary equipment and **eyeTRAFFIC** software.

## WHAT IS eyeTRAFFIC?

**eyeTRAFFIC** is a dynamic web based platform that has a range of application specific modules designed to meet the requirements of monitoring and managing vehicle movement.

**Our range of applications currently supported include:**

- Car Park Management
- DVLA Tax Check
- Vehicle Flow Management
- Traffic Surveys
- Security Monitoring
- Access Control
- Speed Monitoring
- Moving Traffic Enforcement - No Through Route Enforcement

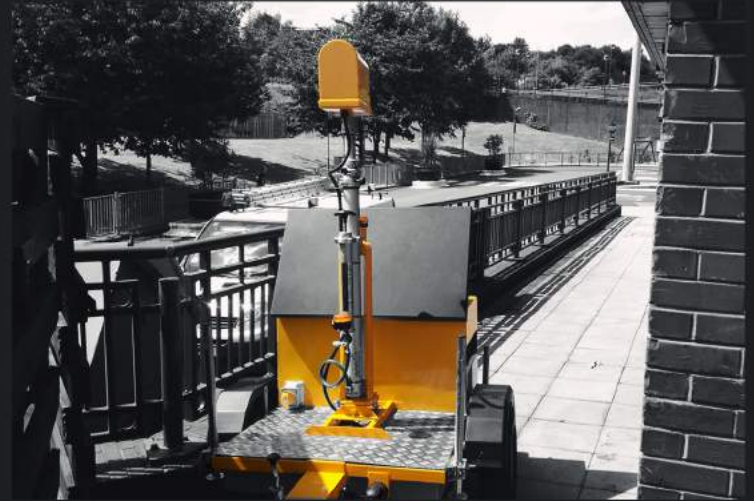

## WHAT IS speedSENTINEL?

**speedSENTINEL** is the first of its kind ~ a trailer mounted, self contained, traffic speed monitoring system. The **speedSENTINEL** houses its own on-board power supply and pneumatic telescopic mast which supports the integral Radar Speed detector and Automatic Number Plate Recognition (ANPR) camera unit. The device is intended to be used for monitoring the speed of vehicles for Health and Safety on private roads, transport interchanges and distribution sites... to name a few.

**speedSENTINEL** is designed to allow quick and easy deployment in a multitude of operating environments and has a range of programmable speed detection settings to suit the operators needs and the particular area to be monitored.

**speedSENTINEL** is able to operate up to **40hrs** on a single charge, continuously recording/monitoring the speed of approaching vehicles and recording images of all vehicles exceeding the imposed speed, logged by it's VRM.

## KEY BENEFITS OF speedSENTINEL?

-  **Monitor speed of all vehicles within a designated site**
-  **Improves safety for customers, staff and the public**
-  **Ability to warn those who don't comply with the speed limit**
-  **Decrease the likelihood of pedestrian & vehicle accidents on site**

**speedSENTINEL** is supplied with:

- S-ANPR Camera/Radar Unit
- Extendable 4m Pneumatic Telescopic Mast
- Stabilising and levelling feet
- Removable Towing Hitch & Jockey Wheel
- LED Warning Beacons

## HOW DOES IT WORK?

**speedSENTINEL** is created with tailored speed presets and zones. The zones and speeds are controlled using a 10" Touch Screen display. **speedSENTINEL** monitors vehicles approaching the device; if a vehicle exceeds the predefined speed limit, a high resolution image of the offending vehicle is captured and stored on our **eyeTRAFFIC** server, along with the vehicle's VRM and the time the incident occurred allowing the operator to pursue in a way they feel appropriate.
